NESTLE warning pyramid 70 cm, caution (VZ101), white, with spring

Quick safeguarding of danger zones

Product number :19000001

Topfeatures

- Uncomplicated set up
- Small transport size
- Variable in the application

All special features at a glance

- Our warning pyramids are extremely variable. You can choose from over 200 different inscriptions (PDF list under downloads), which specifically point out the type of danger.
- To withstand changing weather conditions, the frames are robust and rust-protected and made of anodised aluminium or powder-coated steel (spring mechanism).
- Cover made of resistant, PVC-coated synthetic fabric in white, triangle in red luminous colour
- All warning pyramids are equipped with a standardised adapter and foldable carrying handle. Warning lights, among other things, can be easily mounted on top of them.

Description

Please note the article numbers and technical data when ordering.The NESTLE warning pyramids are ideally suited for securing emergency scenes, at construction sites, during surveying work or as an indication of dangerous situations. Thanks to anodised aluminium and PVC plastic fabric, the warning pyramid defies all weather conditions. The warning pyramids are available in 70 cm or 90 cm side lengths. Also available as a light version with a central foot, or as a heavy version with a spring mechanism without a central foot. The spring mechanism makes it easy and quick to erect and dismantle. Furthermore, there are four different covers for the warning pyramids: white daylight, white retro-reflective, yellow and yellow retro-reflective. The reflective covers are ideal for night use and increase your safety. You can choose between the danger symbol "Caution" (VZ101), "Shovel man" (VZ123) and "No smoking". In addition, there are over 200 individual inscriptions to choose from that specifically indicate the type of danger.
