

NESTLE additional weight 2 kg for light warning pyramids

For the perfect stand - in wind and weather!

Product number :19901000

All special features at a glance

- An additional pole weight is available for our warning pyramids. This increases the stability in case of strong wind or wind caused by passing vehicles. The additional weight can remain mounted during transport.

Description

With the rod weight you increase the stability enormously and extend the range of use. For all warning pyramids with a central foot.
