

NESTLE camera tripod Tripod head rotatable and swivelling

No shaking when triggering the measurements

Product number :13911000

Topfeatures

- Easy to transport quick to use
- Simplest operation
- Allows higher precision when working with rangefinders

All special features at a glance

- A line laser can be quickly and easily adjusted to the desired height with the crank.
- When working with rangefinders, the fixation increases the measuring accuracy enormously - no more shaking when triggering measurements.
- Head swivels and tilts
- Head plate with quick-release fastener for fast exchange of units
- With carrying handle on the centre column

Description

The NESTLE photo tripod with 1/4" connection is ideal for working with rangefinders or line lasers. A line laser can be quickly and easily brought to the desired height with the crank. When working with rangefinders, the photo tripod can be used to fix the equipment. No more shaking when triggering the measurements and thus the measuring accuracy is increased enormously.
