- The lightweight aluminium tripod is especially suitable for levelling measurements where the location has to be changed often and quickly
- Light version
- Use of high quality aluminium
- Outstanding ease of use due to quick-locking mechanism

Description

The lightweight levelling tripod is especially suitable for levelling measurements where the location has to be changed often and quickly. The quick-locking mechanism with ergonomically designed eccentric clamps ensures easy operation of the tripod. To avoid errors during measurements, the tripod has an integrated bubble level in the head for quick and safe setting up.
