

## NESTLE C-clamp with spirit level 20'

### Additional bubble for rods from 24-32 mm diameter

Product number :14979000

#### Topfeatures

- Additional or replacement bubble for prism poles and antenna poles.
- Best pressure distribution due to c-shaped claws.
- Excellent for carbon rods.
- Can be attached to the pole at any height.

#### All special features at a glance

- The NESTLE C-clamp with 20' bubble is used as an additional or replacement bubble on prism poles or GNSS poles.
- The c-shaped claws distribute the pressure on the pole evenly so that the pole is not damaged. This clamping method is especially recommended for carbon rods.
- The NESTLE C-clamp with 20' spirit level can be flexibly mounted at any height on the pole by means of the screw clamp to always ensure good visibility on the spirit level.

#### Description

The NESTLE C-clamp with 20' spirit level can be used as an additional or replacement spirit level for prism poles and antenna poles with a rod diameter of 24-32 mm. The C-clamp is particularly suitable for carbon rods due to the even distribution of pressure. The bubble level can be attached to the pole at any height.
