

GeoMax MR360 machine receiver with clamp

Machine receiver with clamp fastening

Product number :27605000

Description

The MR360 clamp-mounted machine receiver provides accurate height information for all visual machine control applications. This is made possible by large 360° detection windows that can detect the beams of rotating lasers from any angle. The integrated vertical indicator monitors the angle of the pole and indicates whether it is plumb or under/over extended. The indicator shows directional arrows for precise adjustment of the boom. The receiver is easy to set up.

Technical Details

Fastening	Clamp
Reception area	25 cm
Receiving angle	360°
Accuracy Fine	6 mm
Accuracy Coarse	12 mm
Reach	200 m
Power supply	MiMh batteries - rechargeable
Vertical display	+/-5°

Scope of supply

MR360, Clamp fastening, Suitcase, Batteries and charger
