

NESTLE Manhole cover lifter

Protect your back and increase occupational safety

Product number :21000001

Topfeatures

- Using the manhole cover lifter saves your strength and your back.
- Easy adjustment to your body size thanks to the telescopic guide rod.
- Minimises the risk of pinched fingers and toes.

All special features at a glance

- Promotion of occupational health and safety possible
- Ideal for maintenance work, road construction and sewer cleaning.
- Suitable for all types of manholes, thanks to extensive range of hooks for different manhole cover shapes.
- Simple operation
- Increased leverage due to the telescopic guide rod, the effort required is thus reduced.

Description

With the NESTLE manhole cover lifter you can lift even heavy manhole covers comfortably. The ergonomic device is not only suitable as ideal work protection for everyone, but can also be used for maintenance work, road construction and sewer cleaning. The manhole cover lifter is also interesting for surveying offices, for opening manholes and for determining bed depths. Thanks to a wide range of hooks, it is suitable for almost all road manholes. Operation is very simple: approach the manhole cover, insert the lever pin and lift the manhole cover without effort thanks to the increased leverage of the telescopic guide rod.
