

NESTLE PULSAR HV-G SET

Easy handling with highest precision

Product number :16021001

All special features at a glance

- Practical set consisting of
- NESTLE MULTifunction Laser PULSAR HV-G
- NESTLE elevating tripod, medium aluminium version, self-impending
- NESTLE laser bar with sliding adapter and clamping lever (length 130 240 cm)
- NESTLE laser receiver PDRG60 with mm display.

Description

The PULSAR HV-G is a robust yet accurate multifunction laser with three working modes: rotation, scan line and point mode. In addition, the HV-G can be manually tilted in two axes up to $\pm 5^\circ$. The green laser beam is perceived by the human eye 4 times better than a red beam. Its intuitive operating concept and robust construction make it easy to handle. The switchable tilt function, which stops the laser in case of vibrations or shocks, prevents incorrect measurement results. The HV-G can also be used vertically. Complete package with remote control, including laser receiver PDRG60 with mm display, unique in this class! The Pulsar HV-G is supplied in a set with a medium-heavy crank stand and laser batten.

Technical Details

Working range	Ø 500 m
Operating time	20 h
Weight laser	3000 g
Laser diode / colour	535 nm, class 3 / green
Dimensions laser	215 x 190 x 210 mm
Rotation speed	0; 60; 120; 300; 600 U/min
Protection class	IP65
Self-levelling range	$\pm 5^\circ$
Temperature range HV-G	0 °C to +40 °C
Tolerance (Defined at 25°C in horizontal application)	± 1 mm per 10 m

Scope of supply

NESTLE MULTifunction Laser PULSAR HV-G, NESTLE elevating tripod, NESTLE laser rod, Laser receiver PDRG60 with clamp, Carrying case, Wall mount, Target board, Charger, Remote control, Laser goggles
