

NESTLE steel ranging pole, dismantlable, round tube tip, length 2.16 m, r/w w/r 12 pieces in set (of no. 11102000)

Practical set of 12 with colour gradient: 6 pieces red/white, 6 pieces white/red

Product number :11102200

Topfeatures

- Dismountable steel alignment bars with 2 tips
- Robust and durable due to the PVC sheathing
- All ranging poles are MADE IN GERMANY
- Sturdy steel pickaxe
- Space-saving

All special features at a glance

- On the one hand, the dismantlable version can be transported in a space-saving way; on the other hand, the two segments are ideal when many points need to be marked. For this purpose, both parts can be used individually.
- Use of best steel (Ø 27 mm) in production

Description

Ranging poles are used to mark and signal terrain or boundary points during construction and surveying work. In addition, ranging poles help to align or align in the straight line between two poles with a third ranging pole. The two-colour paint makes the alignment rods easily recognisable even from a distance. The colour fields are 50 cm long. Sturdy steel tips are used for robust work on hard surfaces. Only the best steel (Ø 27 mm) is used for this ranging pole. On the one hand, the dismantlable version can be transported in a space-saving way, on the other hand, the two segments are ideal when many points have to be marked. NESTLE steel alignment rods are PVC-coated for a long service life. Quality Made in Germany.

Technical Details

Colour	Normal red
Gradient	6 pieces red/white, 6 pieces white/red
Length	2.16 m
Material	Steel tube
