All special features at a glance

- The upper beam can also be mounted to the lower beam for working on high slab formwork.
- One spar is laser-inscribed with two measurements (100 cm and 77.3 cm).

Description

The Stachel-Staff is a flexible tool for easy, precise and above all safe alignment of conventional ceiling formwork. The Stachel-Staff works like a conventional laser staff. Due to its special shape, the Stachel-Staff, with height-adjustable laser receiver, simply attached to the shuttering beams, hangs and the pillars to the desired height set up. The rotating laser can be above or below the ceiling formwork to be positioned.
