

## NESTLE Accessories Tripods

### Move laser without moving tripod

Product number :13922000

#### Topfeatures

- easy handling
- quick assembly
- infinitely variable lateral shifting
- horizontal rotation

#### All special features at a glance

- The horizontal jib has a 5/8 thread and can be attached to all surveying tripods.
- The laser is screwed tight with the central tightening screw so that it can be rotated 360°.
- You can move the unit sideways from 5 cm to 25 cm without moving the stand.

#### Description

The NESTLE horizontal extension arm allows you to move an instrument laterally from 5 cm up to 25 cm without moving the tripod. The horizontal extension arm has a 5/8" thread and can be attached to all surveying tripods. The instrument is screwed tight with the central tightening screw and can then be rotated 360°.

#### Technical Details

Weight	660 g
