

GeoMax MR240 Machine Receiver

Ideal for use with trenchers and mini excavators

Product number :27600000

Topfeatures

- Accurate terrain height/soil depth information for all visual machine control applications.
- Extra-strong magnets made from rare earths.
- Robust and waterproof construction.

All special features at a glance

- Equipped with magnetic holder with extra-strong rare earth magnets.

Description

The MR240 machine receiver is ideal for use with trenchers and mini excavators. The LED display lets you know which direction to move in at all times. The MR240 provides accurate height information for all optical machine control applications with a reception angle of 240°. The strong magnet makes the MR240 easy to mount, even without a mounting bracket.

Technical Details

Battery power	130 h
Reception area	14 cm
Receiving angle	240°
Accuracy Fine	6 mm
Accuracy Coarse	30 mm
Weight	2200 mm
Dimensions	220 x 120 x 100 mm
Reach	200 m
Protection class	IP67
Power supply	3 x AA

Scope of supply

GeoMax MR240 Machine Receiver, Suitcase, Batteries, Soil nail
