- With the optional DST 360 package, you can precisely target points and measure distances between any 2 points.
- The Leica DISTO X3 and X4 can be quickly and easily connected to an app for transferring and documenting measurements.

Description

The robust laser distance meter Leica DISTO X4 with IP65 protection class is specially designed for tough and harsh conditions in the field. With the optional Leica DST 360 adapter, the X-series can be expanded to a powerful 3D recording station! The DISTO X4 is equipped with a pointfinder camera that allows you to easily target objects even in bright sunlight. You can also measure distances and height differences between any two points with the additional adapter. With the free Leica DISTO sketch app, you can easily and quickly transfer your measurements to tablets or smartphones.
