

## METOR receiver MTR-60RGL

### Laser receiver: Small. Precise. Universal.

Product number :16832000

#### Topfeatures

- Receiver for rotating lasers and line lasers
- Receiver for red and green laser beams
- Receiver Made in Germany
- Precise with millimetre display

#### All special features at a glance

- Metor MTR-60 is universal. The MTR-60RGL model receives rotating and line lasers.
- Metor MTR-60 is highly precise. Each unit is individually calibrated. The resulting measurement accuracy is among the best on the market.
- Metor MTR-60 is strong. Two powerful neodymium magnets hold it securely to any metal profile. Good for interior work.
- Metor MTR-60 is user-friendly. High-contrast displays on the front and back ensure quick reading of the measured values.
- Metor MTR-60 is comfortable. Thanks to its compact dimensions and light weight, it fits in every shirt pocket and suitcase.

#### Description

Laser receiver Metor MTR-60RGL with millimetre display and for rotating and line lasers with green or red beam. The Metor is waterproof, very robust and has a long battery life. The Metor is "Made in Germany".

#### Technical Details

Works with pulse frequency	7 kHz - 12 kHz (for line lasers)
Battery type	1 x AA
Operating time	> 45 Std.
Receiving angle	+/-45 °
Weight	0.2 kg
Length receiving field	60 mm
Dimensions	135 x 69 x 25 mm
Range with line laser	up to 75 m (radius) m
Range with rotating laser	up to 200 m (radius) m
Protection class	IP67
Wavelengths	510- 650 (red, green) nm

#### Scope of supply

Receiver, Retaining clip, 1 x AA battery
